

■ Coffee Shop Sales Analysis

Brewing Insights, One Cup at a Time

Project Overview

This project analyzes Coffee Shop retail sales data to uncover customer purchasing patterns, sales trends, and product performance. The insights help support smarter business decisions and improve overall store performance.

Project Objectives

■ Analyze sales by day and hour.
■ Identify peak business hours.
■ Compare monthly revenue.
■ Evaluate store location performance.
■ Calculate average order value.
■ Discover best-selling products.
■ Analyze category and product type performance.
■ Provide actionable business recommendations.

Business Questions

■ When are customers most active?
■ Which month generates the highest revenue?
■ Which store performs best?
■ How much does an average customer spend?
■ Which products drive the most revenue?
■ Which categories contribute the most sales?

Expected Outcomes

■ Better inventory planning.
■ Optimized staffing during peak hours.
■ Improved marketing strategies.
■ Higher customer satisfaction.
■ Data-driven decision making.

"Every cup of coffee tells a story—every dataset reveals one."
